EXPERIENCE SUMMARY

- Full Stack Developer with 1.6+ years of experience and exposure across all major phases of the Software Development Lifecycle.
- Excellent Knowledge & hands-on experience with front-end technologies like Angular, Typescript.
- Hands-on working experience with Backend technologies: DotNet Framework Web API, SQL Server, Oracle DB2.
- Self-motivated team player with a passion for solving analytical problems and a thirst for new technologies.

PROJECT EXPOSURE

ProMedik, DecisivEdge

12/2021 – Present

- As a key member, worked on Doctors Accounting, Account Payable, and General Ledger modules of Hospital Management System. As per project requirement provided features like Export To Excel, PDF Generation, Automated Email.
- Involved in requirement gathering and analysis. Interaction with Client regarding sprint-wise use cases specified on Jira as per Agile scrum methodology.
- Responsible for the design and development of responsive front-end interface using Angular with Angular Material. Created Angular Services and libraries for Lookups rather than creating redundant code which is common in other modules.
- Responsible for the design and development using Dot Net FW Web API along with advanced C# features for middle layer and backend. Used Postman tool for testing, Importing - Exporting Web APIs.
- Responsible for the design and development of relational database using SQL Server. Worked on Triggers, RPG calls. Done performance tuning for a few of the reports. Also familiar with VB code.

Tech Stack: Dot Net FW Web API, Angular, Angular Material, SQL Server, Oracle DB2

CollegeBuddy, BE Project

- Developed an Android App for college students and professors in which they can manage all the events, notices, attendance, results etc.
- Used firebase Real time database as backend to manage sign up and login using oAuth2 and other REST APIs.

Tech Stack: Firebase, Android Studio.
